PROFESSIONAL SUMMARY

Computer Science undergraduate with strong expertise in Data Structures & Algorithms (300+ problems solved) and hands-on experience in backend and full-stack development using MERN stack and Spring Boot. Proficient in designing RESTful APIs, implementing JWT-based authentication, and building scalable database-driven applications.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, Spring Boot, RESTful API Development

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub, Docker, Postman, VS Code

Core Concepts: Data Structures & Algorithms (DSA), OOP, MVC Architecture, JWT Authentication & Authorization, CRUD Operations, Client-Server Architecture, Linux Commands, Cloud Computing(Basics), CI/CD Pipeline(Basics)

PROJECTS

Car Booking Application (MERN Stack)

Jun 2025 – Oct 2025

Tech Stack: MongoDB, Express.js, React.js, Node.js, Tailwind CSS

- Developed a full-stack ride-booking platform using MERN stack, enabling real-time booking and user interaction.
- Built and optimized RESTful APIs for authentication, ride scheduling, and booking workflows.
- Implemented JWT-based authentication and protected routes, ensuring secure access control.
- Integrated geolocation APIs for real-time location tracking and route visualization.

Wearza E-Commerce Platform

Jun 2025 – Aug 2025

Tech Stack: React.js, Node.js, Express.js, Mysql

- Developed a full-stack e-commerce platform with product browsing, cart management, and secure user authentication.
- Designed, implemented RESTful APIs for product, user, and order along with a scalable Mysql tables.
- Applied MVC architecture and modern web development practices to ensure high performance, maintainability, and efficient.

EzyWork Service Provider Platform (MERN Stack)

Nov 2025 – Present

Tech Stack: MongoDB, Express.js, React.js, Node.js

- Built a scalable service marketplace platform connecting users with verified professionals across multiple domains.
- Developed RESTful CRUD APIs for issue posting, expert assignment, and service lifecycle management.
- Implemented role-based access control (RBAC) and secure authentication mechanisms.
- Structured backend using modular MVC architecture to enhance scalability and maintainability.
- Optimized database queries and API performance, reducing response time and improving system efficiency.

ACHIEVEMENTS

5-Star Coder in Java HackerRank

Solved 300+ DSA Problems LeetCode

CERTIFICATIONS

React JS Foundation Course ScholarHat

Full Stack Web Development (MERN) NASSCOM Foundation

Nutanix Certified Associate (NCA 6) Multicloud Infrastructure

EDUCATION

Chitkara University

Aug 2023 – Present

Bachelor of Engineering in Computer Science

CGPA: 9.11

Amlasuli Indranarayan High School (WBCHSE)

2023

Class XII 75.8%

EXTRA-CURRICULAR ACTIVITIES

SafeHaven Hackathon Project

- Developed backend RESTful APIs and designed MongoDB schema for a MERN-based real-time safety application.
- Implemented location tracking features and contributed to scalable system design.
- Collaborated in a 4-member team to integrate frontend and backend components.
